

Let's set new priorities for road construction: reader

Council has approved the re-construction on roads south of Aurora. Seven roads are about to receive resurfacing, the public have written in paper, including myself, and have gone to Town Hall to ask if and when they are going to resurface Vandorf Sideroad between Bayview and

Leslie.

The conditions on this road are terrible, potholes and patches, lots of answers but, nothing has been done in years. Is Vandorf Sideroad part of Aurora?

Has anyone from Council or the Director of Infrastructure ever driven on Vandorf? New subdivision has been in place at Leslie and Bloomington, Leslie was resurfaced up to Vandorf in no time at all. The corner of Vandorf at Leslie is an accident waiting to happen.

Northbound cars on Leslie can't be seen because of trees and shrubs. Tax dollars are spent on projects that do not need as much attention at present. Where does the priority lie?

If Aurora is on the move, let's improve it where necessary.
