

# NORTHERN LIGHTS: November Horoscopes

**By Jodie Cara-Lindley**

Scorpio (October 23 ? November 21)

You may feel that some tough lessons have been completed, Scorpio. November is no different. In fact, you will actually be the change you want to see in the world. Your energy is focused and driven, and you want to make your mark. It is your time to shine.

Sagittarius (November 22 ? December 21)

Some adjustments need to be made in November, Sagittarius. The best way to tackle this is with the gentle strength of the ocean: with ebb and flow. While you may want to be confrontational, you will soon realize resistance is futile. Be flexible.

Capricorn (December 22 ? January 19)

Take a moment now to reflect, Capricorn. Think about how far you have come this year. How much has your perspective changed? How different do you feel? What depth of insight have you achieved thus far? In November, appreciate the wise sage you have become.

Aquarius (January 20 ? February 18)

The depth of your mind, your heart and your ego will be revealed this month, Aquarius. You have changed. You are a much deeper person than a year ago. Life required you to grow, and you met the challenge. You are now more unique than ever. Bravo!

Pisces (February 19 ? March 20)

We are in transitional times, Pisces. Right now, you are being called to make some changes that honor your creativity and depth of insight. Take time to reflect upon what needs to be metamorphosed. If you do, you will emerge as a butterfly does: brilliantly.

Aries (March 21 ? April 19)

You will feel focused, steady and determined in November, Aries. That is good, because there may be some volatility in the air. Meet change with a clear head and an eye to what makes sense, from a practical standpoint. This approach will take you much further.

Taurus (April 20 ? May 20)

You may feel November is transformational, Taurus. What that means is change is afoot. It is really time to get to the truth, honor creativity, and be willing to bust out of your comfort zone. If you choose this path, you will be living more authentically.

Gemini (May 21 ? June 20)

November will be a very busy month for you, Gemini. There will be a palpable intensity, with opportunity for originality, inspiration, transmutation and commitment. By month's end you will feel much lighter and freer, and truly motivated.

Cancer (June 21 ? July 21)

After the quickening of October, comes a bit of ease and a need for solitude in November. While life will still be moving steadily forward, you will need some quiet time. The dust will settle a bit and efforts will take less force. Spend some time at home.

Leo (July 22 ? August 22)

It is time to cultivate the ground you are working with, Leo. Dig deep and uncover buried treasure. What does all this mean? If you are willing to change stagnant and overdue energies that no longer work, you will truly reach another level of mastery.

Virgo (August 23 ? September 22)

Virgo, it is time to harvest the seeds you have sown throughout this year. This requires focused inquiry, a willingness to change what isn't working, and the nurturance of seeds that fit well with your vision. Bring all your power, creativity and energy to this.

Libra (September 23 ? October 22)

Mountains can be moved now Libra, so get working. You have the guts, the vision and the strength, so just get on with it! Change will happen anyway, so you might we well direct it as much as you can. This will bring you into a new and genuine direction.
