Leo (July 22 ? Aug.22)

Let go, let go, and let go some more Leo. Change happens, so there is no use trying to resist. Focus your attention on home, family and friends in June. These will provide solidity and support for you. Allow those close to you to warm your heart.

Scorpio (Oct. 23 ? Nov.21)

Be patient, Scorpio. This isn't easy for a go-getter like yourself. Life is moving forward again, with some minor adjustments. Don't fight so hard against what is being presented to you, even if you don't like it. All challenge is for a greater reason.

Sagittarius (Nov. 22 ? Dec. 21)

Get out in nature this month. The Earth will offer you the beauty and peace that you need. Follow your heart and wherever it leads you. That seems to be towards love, so continue on that path Sagittarius. Things will shift soon enough.

What is your destiny, Aquarius? Have you figured it out yet? You are in the final stages of a complete overhaul of your psyche, which may have seemed a little tense. But there is gold waiting for you. Use your eagle eyes to see the big picture now.

Pisces (Feb. 19 ? March 20)

A new day dawns for you Pisces. The warm spring weather of June brings hope, fresh starts and clean energy. This is exactly what you need. Let go of any old dead weight and float into your new beginning. The tension of previous times is leaving.

Aries (March 21 ?April 19)

Magically, things begin to turn around in June, Aries. What was stuck can now move forward. Resolution and breaking free are themes for you this month, but remember the value of cooperation too. Balance is still required in all you do.

Taurus (April 20 ? May 20)

Remember to ground Taurus. As an earth sign you seek stability anyway, but you need a gentle reminder this month. Forces may oppose you in June, but after that inspiration is close by. Get out and be social once summer hits.
