

NORTHERN LIGHTS: June Horoscopes

The Northern Lights ? June 2013 Horoscopes

By Jodie Cara Lindley

Aries (March 21 ? April 19)

Practice the art of shape-shifting this month: try on many different forms, and wander in alternate directions. This is the perfect time, as you feel a restless urge to break free. Take the opportunity if it speaks to your authenticity.

Taurus (April 20 ? May 20)

Be instinctive in June. Tune into your feelings, as you have the pulse on what is real and what is illusion. Purge out any sense of over-responsibility that does not ring true for you, especially within your closest relationships.

Gemini (May 21 ? June 20)

Connect with your inner child in June, and have faith everything will work out for the best. You may feel like a homebody, in need of some nurturing. Hang back for a while and mull over your feelings, instead of acting out and moving.

Cancer (June 21 ? July 21)

Wake up from your slumber Cancer! Get out and stretch your legs, wander, and explore. You may have been lulled by many voices, but now is the time to listen to your own intonations. It is time for you to shine big and bright.

Leo (July 22 ? August 22)

Commune with nature in June, and move the focus from thoughts to feelings. You will receive more insight if you find some quiet space and alone time. Nurture your heart versus trying to find love from the outside world.

Virgo (August 23 ? September 22)

The best way for you to shine in June, dear Virgo, is to let your sense of sentimentality guide you. Revisit your emotional self and welcome the past. Reviewing is an essential part of reordering too. Maybe there are some cobwebs you can clear out.

Libra (September 23 ? October 22)

The way to stoke your inner fire this month is to love yourself unconditionally. Avoid looking to others for your sense of self: this will only lead to feeling trampled on. Care for and protect yourself. This is the only way through it.

Scorpio (October 23 ? November 21)

Now is not the time to be superficial. Reflect, digest, and process your intense feelings this month. While you may feel like skimming the surface, don't. Enter the realm of the deep, which is your natural go-to anyway.

Sagittarius (November 22 ? December 21)

You will feel a big shift in June that may be unsettling. Your feelings are unfolding, whether you want them to or not! Open up to vulnerability and softness. Crack open your protective shell and let the light in. Leave the mind behind.

Capricorn (December 22 ? January 19)

Be open to perspectives other than your own. Let go of the illusion that only you can see the truth. If you remove your blinders in June, you may see life in a whole new light. Allow what others say and do shift your attention and mind.

Aquarius (January 20 ? February 18)

Count your blessings, even though you may feel you don't have any! Embrace the good things even while slugging through the sludge from the past. Release control and focus on realities this month. Your hard work will pay off.

Pisces (February 19 ? March 20)

You are drawn inward this month to tap into your true creative source. Pay attention to dreams, your unconscious, and downloads of inspiration and vision. Your inner poet, artist, and dreamer are awakening. Rejoice.
