

Ontario students can continue learning from ?safety of their own home?

On Friday, Premier Doug Ford joined Stephen Lecce, Minister of Education to launch the first phase of [Learn at Home](#) and [Apprendre à la maison](#), a new online portal that will provide resources for families so students can continue their education while schools are closed due to the ongoing COVID-19 situation.

"As a father myself, I know parents always want the best for their children, and I also know from speaking to parents that many are concerned that their child is going to fall behind while schools are closed during this difficult period," said Premier Ford. "To support families and students, our government has developed a one-stop spot for at-home learning. It doesn't replace school, but offers a great alternative as we approach the end of March Break."

Learn at Home (www.ontario.ca/page/learn-at-home) offers all students high-quality, made-in-Ontario math and literacy resources, created by Ontario-certified educators, in both English and French. Elementary resources are designed to help young students learn at home with interactive activities that encourage participation through entertaining and stimulating digital content. High school content was designed with a focus on STEM (Science, Technology, Engineering and Math) courses and ensure core competencies and skills are reinforced. The government is also providing access to course content for students who take the initiative to refresh and extend their learning.

"The Learn at Home initiative will help mitigate 'learning loss' during this period of uncertainty," said Minister Lecce. "Our plan will provide interactive teacher-led math supports to keep students learning and empower all students to learn key skills with an emphasis on STEM education, while also arming parents with resources to support them as their kids learn at home."

"By offering new at-home educational resources, the province is further supporting Ontario's families as they help contain the spread of COVID-19," said Christine Elliott, Minister of Health.

"Each and every Ontarian has a role to play in flattening the curve. Our government is providing families with the support they need so that they can continue to contribute to our shared goal of protecting the health and wellbeing of all Ontarians, including our young students."

"TVO is proud to be part of this important initiative by the Ministry of Education," added Jennifer Hinshelwood, TVO's Acting Chief Operating Officer. "TVO's suite of digital learning products are designed to engage young minds in learning - a mission that seems doubly important at times like this when many of our traditional learning environments are not accessible."

The at-home activities offered by [Learn at Home](#) provide quick and easy access to some of Ontario's best online kindergarten to grade 12 learning resources produced by Ontario College of Teachers (OCT) Educators. As part of the government's commitment to planning for every scenario, the province is working closely with education stakeholders to develop a plan for scaling and building additional online learning programs.

"In these uncertain times, we are proud as a public agency to join the Ministry of Education's efforts in supporting families and students," said Eric Minoli, TFO's Chief Operating Officer. "Our online [Apprendre à la maison](#) program will help ensure continuity in education for Francophone and Francophile parents. TFO will be offering daily activities which will be accessible at all times on our [IDELLO.ORG](#) platform, [BOUKILI.CA](#) and our TV channel. TFO will remain a proud partner of all families through a tailored program of fun, high-quality educational activities and content, all of which will be aligned with the curriculum of Ontario."
