

Watch the progress on Joint Operations Centre online

If you want to keep an eye on the construction of Aurora's Joint Operations Centre, you're in luck.

The Town of Aurora has launched a livestream of the construction site at www.aurora.ca/JOCStream.

?The new Joint Operations Centre represents a significant financial investment for our community and I felt it was important to provide residents a real-time opportunity to see how our Town's capital funds are being spent,? said Mayor Geoff Dawe. ?Adapting the live-streaming technology we have successfully used for our committee meetings is a great way to engage residents and provide a convenient way to follow the construction progress.?
